

# Sobriety Inclusion Resilience Creativity

**LOCAL AUTHORITIES – THE STATE – COMPANIES – EXPERTS**  
**Together to promote the development of sustainable cities and territories**

The strength of Sustainable City by France is its ability to gather into a single operating task force the State, local authorities, private companies and experts to identify and disseminate the best solutions and tools to accelerate the ecological, social and economic transition of territories.

**Patrice Vergriete,**

*President of Sustainable City by France (SCbF)*

*Mayor of Dunkirk and President of the Dunkirk Urban Community*

## OUR VISION OF SUSTAINABLE TERRITORIES

Faced with the impacts of human activities in all territories (climate change, loss of biodiversity, depletion of resources, etc.), it is urgent to specify the fundamentals of the sustainable city and focus all efforts in shared and desirable trajectories.

SCbF and its members propose a logical framework for a joint action, based on 4 pillars: sobriety, resilience, inclusion and creativity.
